Internet of Things: How did we get here?

Internet of Things V2: DragonBoard™ bring up and community ecosystem

Internet of Things V2: Setting up and Using Cloud Services

Internet of Things: Communication Technologies

Internet of Things: Multimedia Technologies

Internet of Things Capstone V2: Build a Mobile Surveillance System

UC San Diego

Oct 10, 2020

Sandra Hany Helmy Nasry

has successfully completed the online, non-credit Specialization

Internet of Things and AI Cloud

This Specialization covers the development of Internet of Things (IoT) products and services—including devices for sensing, actuation, processing, and communication—to help you develop skills and experiences you can employ in designing novel systems. The Specialization has theory and lab sections. In the lab sections you will learn hands-on IoT concepts such as sensing, actuation and communication. In the final Capstone Project, developed in partnership with Qualcomm, you'll apply the skills you learned on a project of your choice using the DragonBoard 410c platform.

Ganz Chockalingam,
Principal Engineer,
Qualcomm Institute of
Calit2, UC, San Diego

Harinath Garudadri,
Associate Research
Scientist, Qualcomm
Institute of Calit2, UC,
San Diego

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
